Done

Decorating categories in the canvas by changing the background color, shapes etc. User can also hide a category and change the name of the category.

Drag up/down to reorder

Add a new category (row)  
With this feature users can add more categories.

Name of the category to be displayed on the map

Switch on to show the unique ID of the category

Association area:  
Users can use this area to associate and dissociate categories. Association are created from the Configurator editor and here associations are used to connect two categories. This connection helps in filtering and searching data on a map.

Tap to view "association" hints
